North-Holland

Subject index

Aluminium, Aluminium Alloys and Compounds
Dielectric loss of alumina between 95 and 330 K at ECRH frequencies (Letter to the Editors), R. Heidinger 173 (1990) 243
The effect of the exposure to different irradiation sources on the thermal conductivity of Al_2O_3, M. Rohde and B. Schulz 173 (1990) 289

Analytical Instruments and Methods
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Beryllium, Beryllium Alloys and Compounds
Reaction of LiH and BeH_2, P.E. Barry, J.S. Bowers, R.G. Garza, P.C. Souers, J.S. Cantrell and T. Beiter 173 (1990) 142

Blanket Materials
Swelling of tritiated lithium hydride over the first 150 days, J.A. Emig, S.R. Mayhugh, F. Garcia and P.C. Souers 173 (1990) 113
Caustic stress corrosion cracking of stainless steel 316L in concentrated lithium hydroxide (Letter to the Editors), J.H. Zheng and W.F. Bogaerts 173 (1990) 101
Reaction of LiH and BeH_2, P.E. Barry, J.S. Bowers, R.G. Garza, P.C. Souers, J.S. Cantrell and T. Beiter 173 (1990) 142
Swelling of tritiated lithium hydride powder, P.C. Souers, C.L. Folkers, T. McCreary, R.O. Lindahl, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 173 (1990) 159
MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part I: Theory and description of model capabilities, G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 185
MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part II: Comparison of model predictions with experimental results, G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 214

Ceramics *("Various", i.e. not listed elsewhere by name)*
Application of pyrolytic boron nitride in fusion devices, O.I. Buzhinskij, I.V. Opimach, A.V. Kabishev, V.V. Lopatin and Y.P. Surov 173 (1990) 179
MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part I: Theory and description of model capabilities, G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 185
MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part II: Comparison of model predictions with experimental results, G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 214

Cladding Materials
Release of volatile carbon-14 containing products from Zircaloy, D. Kopp and H. Münzel 173 (1990) 1
Grain boundary diffusion in α-zirconium. Part i: Self-diffusion, K. Vieregge and C. Herzig 173 (1990) 118

Coatings *(and Coated Particles)*
Tritium sorption and chemical and topographical properties of a stainless steel surface modified with chromium, T. Hirabayashi, S. Poosittisak, Y. Sun and M. Saeki 173 (1990) 26
Heat-induced redistribution of surface oxide in uranium, E. Swissa, N. Shamir, M.H. Mintz and J. Bloch 173 (1990) 87

Compatibility and Corrosion
A fractographic study of stress corrosion cracking of Zircaloy-4 in a methanol/HCl solution, M.-H. Hong, S.-I. Pyun, S.-U. Chung and J.-S. Kim 173 (1990) 7
Caustic stress corrosion cracking of stainless steel 316L in concentrated lithium hydroxide (Letter to the Editors), J.H. Zheng and W.F. Bogaerts 173 (1990) 101
Influence of final recrystallization heat treatment on Zircaloy-4 strip corrosion, J.P. Foster, J. Dougherty, M.G. Burke, J.F. Bates and S. Worcester 173 (1990) 164

Computer Calculations, including Modelling
The mechanism of nucleation of vacancy loops with Burgers vectors ⟨100⟩ in bcc

metals, V.G. Kapinos, Y.N. Osetskii and P.A. Platonov 173 (1990) 229

Constitution
Precipitation and identification of carbides in a Zr–2.5 wt% Nb alloy, R. Piotrkowski, G. Vigna and R. Versaci 173 (1990) 78

Defects and Defect Structures
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Diffusion *(incl. Thermodiffusion)*
Migration of fission product barium in UO_2 fuel under transient conditions, C.T. Walker, C. Bagger and M. Mogensen 173 (1990) 14
Precipitation and identification of carbides in a Zr–2.5 wt% Nb alloy, R. Piotrkowski, G. Vigna and R. Versaci 173 (1990) 78
Diffusion of implanted sodium in iron and AISI 316 Ti stainless steel, A. Kehrel, K.P. Lieb, N. Scapellato and M. Uhrmacher 173 (1990) 284
The compensation effect on diffusion constants of hydrogen in metals, K. Watanabe, K. Ashida and M. Sonobe 173 (1990) 294

Electrical Properties
Transport property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 274

Electron Microscopy and Electron Probe Microanalysis
Study by electron diffraction of precipitation in low iron content Zr–Fe alloys (Letter to the Editors), R. Borrelly and P. Merle 173 (1990) 105

Experimental Techniques
Etude, par spectroscopies optiques de reflexion dans l'ultraviolet, visible, proche infrarouge et infrarouge, par spectroscopie XPS de l'oxydation d'un alliage Ni–20Cr , M. Le Calvar and M. Lenglet 173 (1990) 71
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Fast Reactors
Diffusion of implanted sodium in iron and AISI 316 Ti stainless steel, A. Kehrel, K.P. Lieb, N. Scapellato and M. Uhrmacher 173 (1990) 284

Fission Products
Migration of fission product barium in UO_2 fuel under transient conditions, C.T. Walker, C. Bagger and M. Mogensen 173 (1990) 14
Mass spectrometric vaporization study on palladium–zirconium alloys, S. Stølen, T. Matsui and K. Naito 173 (1990) 48

Fracture and Fracture Toughness
Initiation of delayed hydride cracking in zirconium–2.5 wt% niobium, A.F. Shalabi and D.A. Meneley 173 (1990) 313

Fuels and Fuel Elements
Migration of fission product barium in UO_2 fuel under transient conditions, C.T. Walker, C. Bagger and M. Mogensen 173 (1990) 14
Mass spectrometric vaporization study on palladium–zirconium alloys, S. Stølen, T. Matsui and K. Naito 173 (1990) 48
Concentration profiles of neutron-induced radioactivities in UO_2 fuel specimens, F.E. Osaisai, S.G. Prussin and D.R. Olander 173 (1990) 149

Fusion Reactors
Radiation-enhanced sublimation experiments using the Sandia high-heat-flux test facility (Letter to the Editors), A.A. Haasz, J.W. Davis, C.D. Croessmann, B.L. Doyle, R.E. Nygren, D.S. Walsh, J.G. Watkins and J.B. Whitley 173 (1990) 108
Application of pyrolytic boron nitride in fusion devices, O.I. Buzhinskij, I.V. Opimach, A.V. Kabishev, V.V. Lopatin and Y.P. Surov 173 (1990) 179
Dielectric loss of alumina between 95 and 330 K at ECRH frequencies (Letter to the Editors), R. Heidinger 173 (1990) 243
The effect of the exposure to different irradiation sources on the thermal conductivity of Al_2O_3, M. Rohde and B. Schulz 173 (1990) 289

Gases *(excl. Tritium)* **in Metals, Alloys and Ceramics**
Heat-induced redistribution of surface oxide in uranium, E. Swissa, N. Shamir, M.H. Mintz and J. Bloch 173 (1990) 87

Graphite and Carbon
Release of volatile carbon-14 containing products from Zircaloy, D. Kopp and H. Münzel 173 (1990) 1

Helium
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Hydrogen and Hydrides *(incl. Deuterium and Deuterides)*
Reaction of LiH and BeH_2, P.E. Barry, J.S. Bowers, R.G. Garza, P.C. Souers, J.S. Cantrell and T. Beiter 173 (1990) 142
Swelling of tritiated lithium hydride powder, P.C. Souers, C.L. Folkers, T. McCreary, R.O. Lindahl, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 173 (1990) 159
The compensation effect on diffusion constants of hydrogen in metals, K. Watanabe, K. Ashida and M. Sonobe 173 (1990) 294
Initiation of delayed hydride cracking in zirconium–2.5 wt% niobium, A.F. Shalabi and D.A. Meneley 173 (1990) 313

Impurities
Study by electron diffraction of precipitation in low iron content Zr–Fe alloys (Letter to the Editors), R. Borrelly and P. Merle 173 (1990) 105

Iron and Iron Alloys *(excl. Steels)*
Radiation-enhanced sublimation experiments using the Sandia high-heat-flux test facility (Letter to the Editors), A.A. Haasz, J.W. Davis, C.D. Croessmann, B.L. Doyle, R.E. Nygren, D.S. Walsh, J.G. Watkins and J.B. Whitley 173 (1990) 108
Concentration profiles of neutron-induced radioactivities in UO_2 fuel specimens, F.E. Osaisai, S.G. Prussin and D.R. Olander 173 (1990) 149
Diffusion of implanted sodium in iron and AISI 316 Ti stainless steel, A. Kehrel, K.P. Lieb, N. Scapellato and M. Uhrmacher 173 (1990) 284

Irradiation Effects *(excl. Swelling and Voids)*
Radiation damage studies of ion-irradiated low-activation developmental martensitic steel alloys for fusion applications, D.J. Mazey, W. Hanks and D.K. Lurcook 173 (1990) 34
The mechanism of nucleation of vacancy loops with Burgers vectors ⟨100⟩ in bcc metals, V.G. Kapinos, Y.N. Osetskii and P.A. Platonov 173 (1990) 229
Dielectric loss of alumina between 95 and 330 K at ECRH frequencies (Letter to the Editors), R. Heidinger 173 (1990) 243
The effect of the exposure to different irradiation sources on the thermal conductivity of Al_2O_3, M. Rohde and B. Schulz 173 (1990) 289

Liquid Metals
Diffusion of implanted sodium in iron and AISI 316 Ti stainless steel, A. Kehrel, K.P. Lieb, N. Scapellato and M. Uhrmacher 173 (1990) 284

Mechanical Properties *("Various", i.e. not listed elsewhere by name)*
Anisotropy of the shear modulus in hcp-zirconium single crystals (Letter to the Editors), N. Christodoulou, A. Salinas-Rodriguez and S. Ves 173 (1990) 98

Nickel and Nickel Alloys
Etude, par spectroscopies optiques de reflexion dans l'ultraviolet, visible, proche infrarouge et infrarouge, par spectroscopie XPS de l'oxydation d'un alliage Ni–20Cr , M. Le Calvar and M. Lenglet 173 (1990) 71

Niobium and Niobium Alloys
Thermophysical property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 261
Transport property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 274

Phase Transformation
Multiple martensitic transformations in plutonium metal and a suggested similarity in electronic behavior of plutonium metal phases and d-electron transition element alloys, T.A. Sandenaw and J.F. Andrew 173 (1990) 59

Physical Properties *("Various", i.e. not listed elsewhere by name)*
Anisotropy of the shear modulus in hcp-zirconium single crystals (Letter to the Editors), N. Christodoulou, A. Salinas-Rodriguez and S. Ves 173 (1990) 98
Dielectric loss of alumina between 95 and 330 K at ECRH frequencies (Letter to the Editors), R. Heidinger 173 (1990) 243

Plutonium, Plutonium Alloys and Compounds
Multiple martensitic transformations in plutonium metal and a suggested similarity in electronic behavior of plutonium metal phases and d-electron transition element alloys, T.A. Sandenaw and J.F. Andrew 173 (1990) 59

Powder Processes and Products
A novel surface chemical treatment to improve the quality of sintered UO_2 pellets, B. Venkataramani and R.M. Iyer 173 (1990) 255

Recrystallization, Recovery and Grain Growth
Influence of final recrystallization heat treatment on Zircaloy-4 strip corrosion, J.P. Foster, J. Dougherty, M.G. Burke, J.F. Bates and S. Worcester 173 (1990) 164

Refractory Metals and Alloys *("Various", i.e. not listed elsewhere by name)*
Multiple martensitic transformations in plutonium metal and a suggested similarity in electronic behavior of plutonium metal phases and d-electron transition element alloys, T.A. Sandenaw and J.F. Andrew 173 (1990) 59

Steels
Tritium sorption and chemical and topographical properties of a stainless steel surface modified with chromium, T. Hirabayashi, S. Poosittisak, Y. Sun and M. Saeki 173 (1990) 26
Radiation damage studies of ion-irradiated low-activation developmental martensitic steel alloys for fusion applications, D.J. Mazey, W. Hanks and D.K. Lurcook 173 (1990) 34
Caustic stress corrosion cracking of stainless steel 316L in concentrated lithium hydroxide (Letter to the Editors), J.H. Zheng and W.F. Bogaerts 173 (1990) 101
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Structural Materials
Precipitation and identification of carbides in a Zr–2.5 wt% Nb alloy, R. Piotrkowski, G. Vigna and R. Versaci 173 (1990) 78

Surface Effects and Characterization Techniques
Tritium sorption and chemical and topographical properties of a stainless steel surface modified with chromium, T. Hirabayashi, S. Poosittisak, Y. Sun and M. Saeki 173 (1990) 26
Radiation-enhanced sublimation experiments using the Sandia high-heat-flux test facility (Letter to the Editors), A.A. Haasz, J.W. Davis, C.D. Croessmann, B.L. Doyle, R.E. Nygren, D.S. Walsh, J.G. Watkins and J.B. Whitley 173 (1990) 108
Application of pyrolytic boron nitride in fusion devices, O.I. Buzhinskij, I.V. Opimach, A.V. Kabishev, V.V. Lopatin and Y.P. Surov 173 (1990) 179
A novel surface chemical treatment to improve the quality of sintered UO_2 pellets, B. Venkataramani and R.M. Iyer 173 (1990) 255
Diffusion of implanted sodium in iron and AISI 316 Ti stainless steel, A. Kehrel, K.P. Lieb, N. Scapellato and M. Uhrmacher 173 (1990) 284
Study of near surface defects in He-implanted stainless steels by monoenergetic positron beam, A. Uedono, S. Tanigawa and H. Sakairi 173 (1990) 307

Swelling
Swelling of tritiated lithium hydride over the first 150 days, J.A. Emig, S.R. Mayhugh, F. Garcia and P.C. Souers 173 (1990) 113
Swelling of tritiated lithium hydride powder, P.C. Souers, C.L. Folkers, T. McCreary, R.O. Lindahl, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 173 (1990) 159

Thermal Reactors
Migration of fission product barium in UO_2 fuel under transient conditions, C.T. Walker, C. Bagger and M. Mogensen 173 (1990) 14
Precipitation and identification of carbides in a Zr–2.5 wt% Nb alloy, R. Piotrkowski, G. Vigna and R. Versaci 173 (1990) 78

Thermodynamic Properties
Mass spectrometric vaporization study on palladium–zirconium alloys, S. Stølen, T. Matsui and K. Naito 173 (1990) 48
The thermal conductivity of UO_2 sphere-pac beds, R.O.A. Hall, D.G. Martin and M.J. Mortimer 173 (1990) 130

Thermophysical Properties
Thermal diffusivity of UO_2–Gd_2O_3 pellets, M. Hirai 173 (1990) 247
Thermophysical property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 261
The effect of the exposure to different irradiation sources on the thermal conductivity of Al_2O_3, M. Rohde and B. Schulz 173 (1990) 289

Tritium
Swelling of tritiated lithium hydride over the first 150 days, J.A. Emig, S.R. Mayhugh, F. Garcia and P.C. Souers 173 (1990) 113
Tritium sorption and chemical and topographical properties of a stainless steel surface modified with chromium, T. Hirabayashi, S. Poosittisak, Y. Sun and M. Saeki 173 (1990) 26
Swelling of tritiated lithium hydride powder, P.C. Souers, C.L. Folkers, T. McCreary, R.O. Lindahl, G.D. Snider, F. Vanderhoofven and R.T. Tsugawa 173 (1990) 159
MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part I: Theory and description of model capabilities , G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 185

MISTRAL: A comprehensive model for tritium transport in lithium-base ceramics. Part II: Comparison of model predictions with experimental results, G. Federici, A.R. Raffray and M.A. Abdou 173 (1990) 214

Uranium and Uranium Alloys

Heat-induced redistribution of surface oxide in uranium, E. Swissa, N. Shamir, M.H. Mintz and J. Bloch 173 (1990) 87

Uranium Ceramics

Migration of fission product barium in UO_2 fuel under transient conditions, C.T. Walker, C. Bagger and M. Mogensen 173 (1990) 14

Heat-induced redistribution of surface oxide in uranium, E. Swissa, N. Shamir, M.H. Mintz and J. Bloch 173 (1990) 87

The thermal conductivity of UO_2 sphere-pac beds, R.O.A. Hall, D.G. Martin and M.J. Mortimer 173 (1990) 130

Concentration profiles of neutron-induced radioactivities in UO_2 fuel specimens, F.E. Osaisai, S.G. Prussin and D.R. Olander 173 (1990) 149

Thermal diffusivity of UO_2–Gd_2O_3 pellets, M. Hirai 173 (1990) 247

A novel surface chemical treatment to improve the quality of sintered UO_2 pellets, B. Venkataramani and R.M. Iyer 173 (1990) 255

Vaporization

Mass spectrometric vaporization study on palladium–zirconium alloys, S. Stølen, T. Matsui and K. Naito 173 (1990) 48

Wastes *(radioactive)*

Release of volatile carbon-14 containing products from Zircaloy, D. Kopp and H. Münzel 173 (1990) 1

Zirconium, Zirconium Alloys and Compounds

Release of volatile carbon-14 containing products from Zircaloy, D. Kopp and H. Münzel 173 (1990) 1

A fractographic study of stress corrosion cracking of Zircaloy-4 in a methanol/HCl solution, M.-H. Hong, S.-I. Pyun, S.-U. Chung and J.-S. Kim 173 (1990) 7

Mass spectrometric vaporization study on palladium–zirconium alloys, S. Stølen, T. Matsui and K. Naito 173 (1990) 48

Precipitation and identification of carbides in a Zr–2.5 wt% Nb alloy, R. Piotrkowski, G. Vigna and R. Versaci 173 (1990) 78

Anisotropy of the shear modulus in hcp-zirconium single crystals (Letter to the Editors), N. Christodoulou, A. Salinas-Rodriguez and S. Ves 173 (1990) 98

Study by electron diffraction of precipitation in low iron content Zr–Fe alloys (Letter to the Editors), R. Borrelly and P. Merle 173 (1990) 105

Grain boundary diffusion in α-zirconium. Part I: Self-diffusion, K. Vieregge and C. Herzig 173 (1990) 118

Influence of final recrystallization heat treatment on Zircaloy-4 strip corrosion, J.P. Foster, J. Dougherty, M.G. Burke, J.F. Bates and S. Worcester 173 (1990) 164

Thermophysical property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 261

Transport property correlations for the niobium–1% zirconium alloy, D.J. Senor, J.K. Thomas and K.L. Peddicord 173 (1990) 274

Initiation of delayed hydride cracking in zirconium–2.5 wt% niobium, A.F. Shalabi and D.A. Meneley 173 (1990) 313
